

All dog behaviour makes perfect sense, to the dog.

There is an incredible bond between a dog and their owner. Dogs have an amazing ability to learn, understand and communicate with us.

I believe dogs don't set out to be "bad", and neither do owners! Having a pet dog should be a joyous experience. By far the majority of dogs want to please and do the "right" thing if given the chance. For a dog to be disobedient, they must first understand what it is to be

obedient, they need to know what is being asked of them. There are not many disobedient dogs, but there are many that don't know what their owners want from them.

All dog behaviour makes perfect sense, to the dog. However, some behaviours that our canine friends exhibit are baffling, frustrating and a nuisance to us. For those who are baffled, confused or just wanting to do the best by their dog, understanding your dog's drive and focus are the first steps to your dog having a better understanding of you.

I help owners to "think like a dog". By getting into the minds and understanding their dog's world, owners are in a much better position to understand their weird and wonderful ways. We are then able to improve not just our dog's life, but our own as well.

I help owners to understand the psychology of their dog and this massively improves the communication and bond between dog and owner.
